

CASE STUDY

STABLE

ERP

CONSISTENT
ACROSS ALL MAJOR
BROWSERS AND
PLATFORMS

Project Overview

A cloud ERP system with extensive functionality that includes accounting, inventory tracking, budgeting, payroll, vendor management, and more.

Challenges

01

to establish comprehensive test coverage

02

to align functionality with requirements

03

to develop test cases for extensive functionality validation

04

to ensure extensive browser and operational compatibility

Solution

Executed 700+ test cases, performed impact analysis, and developed smoke testing checklists.

Collaborated with the client to review release changes and enhance testing accuracy.

Covered functional, integration, and cross-browser testing to ensure system efficiency and consistency.

Results

- ✓ Increased test coverage from **67% to 91%**
- ✓ Helped cut the support ticket volume **by 2.7x**
- ✓ Expanded the number of **supported browsers and platforms**
- ✓ Reduced time to market by **20%**

Resources

Team

- Project Manager
- Middle QA Engineer
- QA Tech Lead

Key Testing:

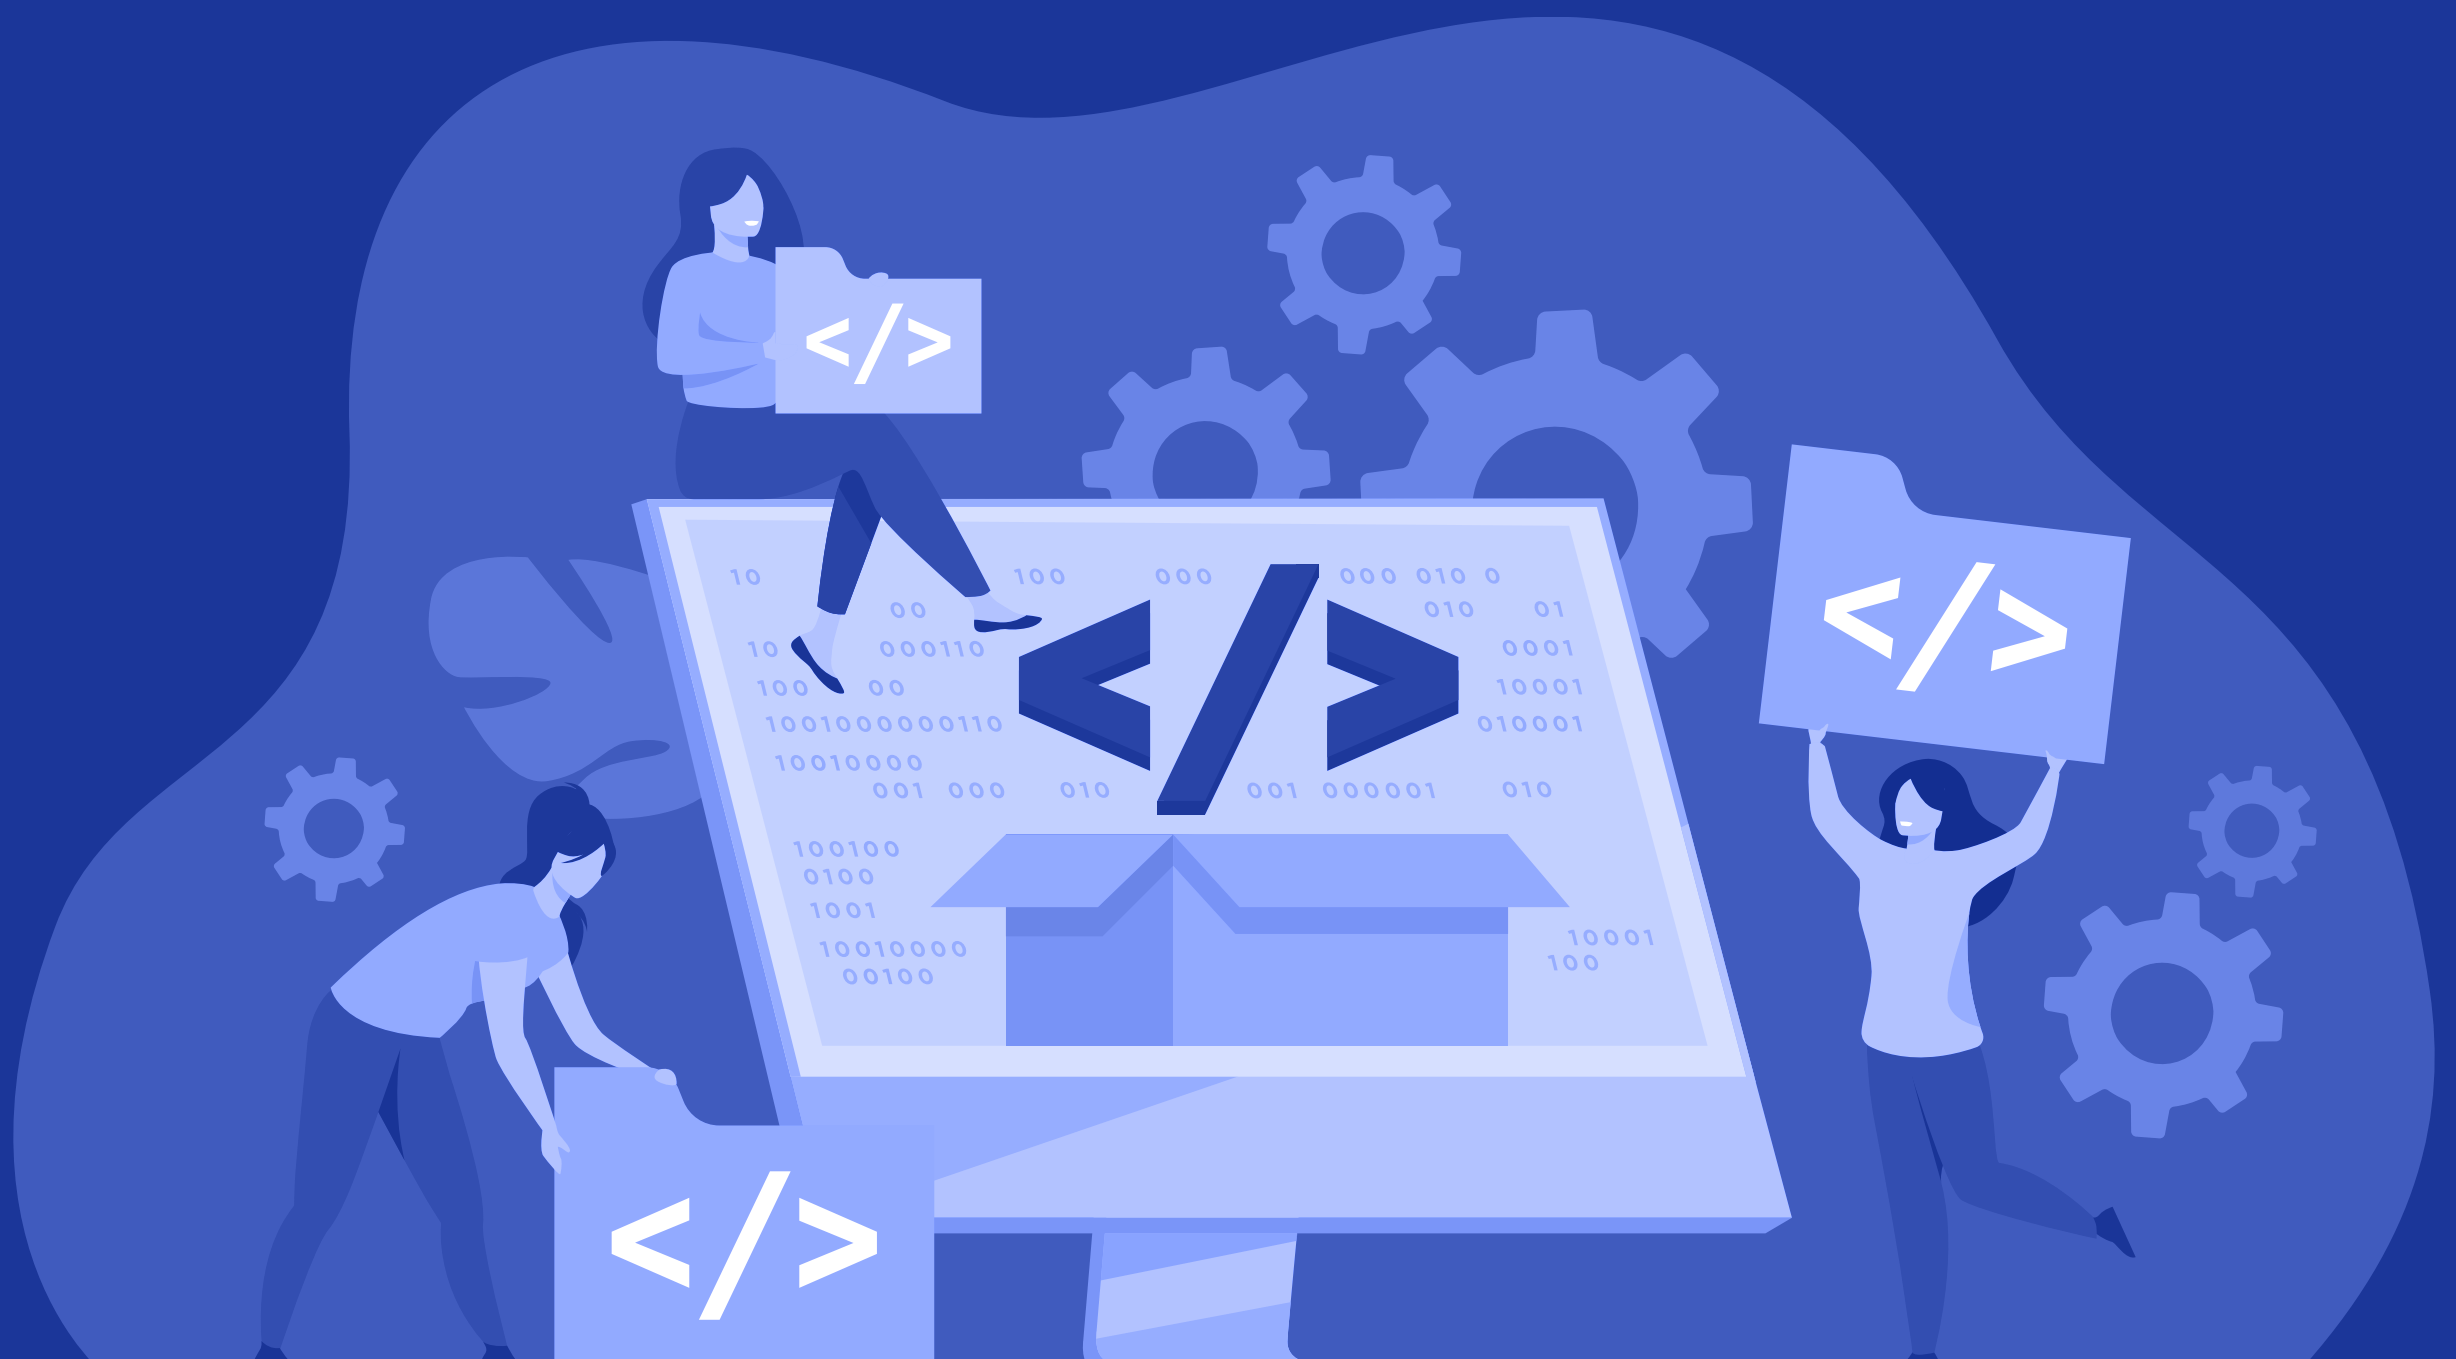

- Functional
- Cross-browser
- Cross-platform
- Integration
