Experienced QA Partner

22+

years of experience
in QA

250+

QA engineers in different
parts of the world

3000+

successful testing
projects completed

15+

years of teaching QA in
our Training Center

Which of Your Needs Can Our QA Services Cover?

Return on Investment (ROI)

By increasing your QA ROI, you can receive tangible business benefits from testing. The earlier a bug is identified in the development cycle, the easier and less costly it is to fix.

Lifetime Value (LTV)

By enhancing your product's quality through rigorous testing, you ensure customer retention but also guarantee that your investment in advertising and customer acquisition brings the desired results.

QA Management

By delegating management of the QA team and processes to our QA Project Managers or QA Tech Leads, you free up your time to focus on other high-priority business tasks.

Process Optimization

By receiving expert QA consulting from our experts, you can get critical insights and valuable strategies to detect bottlenecks in your QA processes and streamline your testing activities.

How Can We Match Your QA Needs?

Scaling up your team on demand
even for urgent needs before the release

Adjusting to your business hours
even if we are in different time zones

A large team of QA professionals
with different levels of qualification
(Junior, Middle, Senior, QA Tech Lead)

Organizing your testing process from scratch or working with the existing workflow to improve and optimize it

We are always ready to discuss your specific requirements and look for the optimal solution for your business

Testing Process Organization

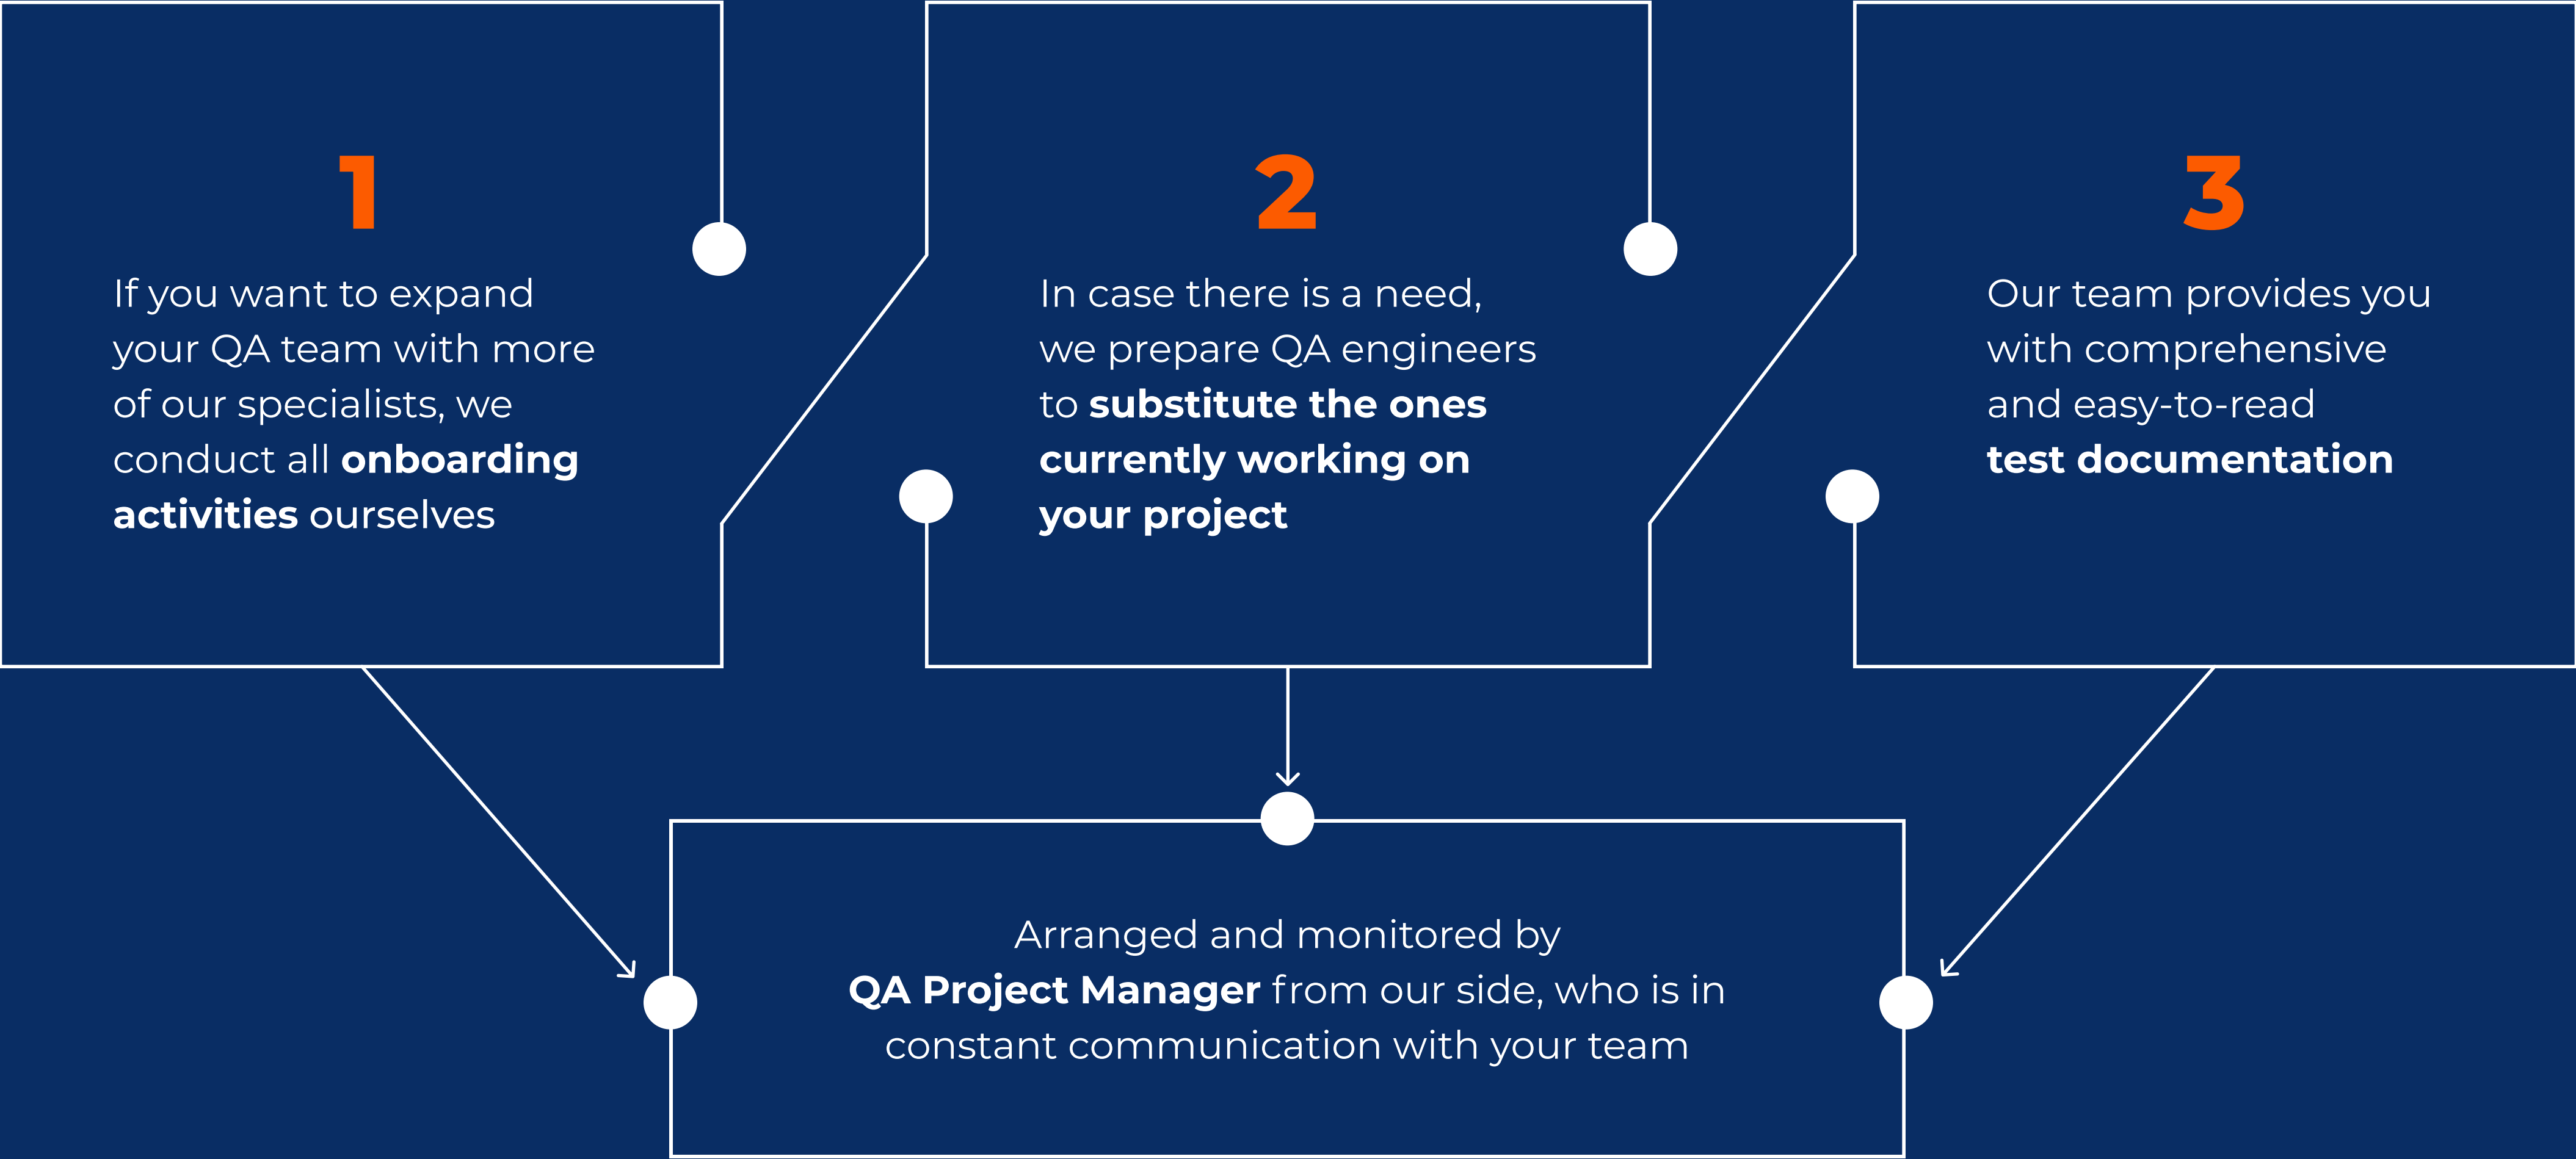

The process is organized autonomously

This means that you can **leave the management and planning of testing activities to us**, while you focus on other priorities or take a vacation. With our expert team, you can rest assured of receiving **comprehensive and timely quality assurance**.

Monitoring the process and arranging all the necessary communications will be taken care of by our team. These aspects of process management are **part of our services** and do not require additional expenses.

Maintaining a Continuous Testing Process

Diverse Pool of Real Testing Devices

500+
gadgets

Our services include access to a wide pool of real testing devices, which we constantly maintain and update.

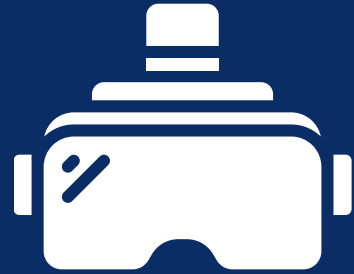

PCs

Smartphones

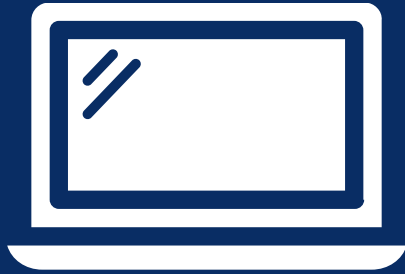

Tablets

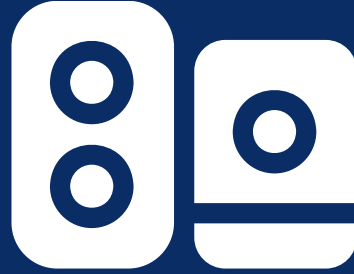

VR headsets

TV sets

Laptops

Multimedia devices

IoT devices

Any gadgets provided by you

Our Tech Stack

Test management tools

Bug trackers

Jira, Bugzilla, Mantis, Trac, Redmine, PR-Tracker, Gemini, JTrac, Eventum, and more.

Project management tools

Testlink, Confluence, Microsoft Project, HP/Mercury Quality, Center (Test Director), etc.

Operating systems

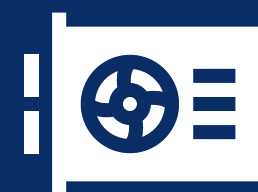

Due to our diverse pool of testing devices with different types and versions of OSs, we provide wide coverage for cross-platform testing. We select and prioritize OSs for testing according to the specifics of the target market.

Desktop operating systems

Mac Family, Windows Family, BSD Family OS, Multiplatform, etc.

Mobile operating systems

IOS, Ipad OS, Android, Windows Mobile, Vision OS

Graphics cards

We conduct performance testing and other types of checks on devices with the following graphics cards

GeForce RTX 10xx, 20xx, 30xx, 40xx, and their analogs.

Our Tech Stack

Types of testing tools we use

- Test automation tools and frameworks
- Database testing tools
- API testing tools
- Compatibility testing tools
- Communications testing tools
- Design testing tools
- Links and HTML testing tools
- Mobile testing tools
- Security testing tools
- Utility testing tools
- Virtualization testing tools
- Performance testing tools

Our Flexible Collaboration Models

At QATestLab, we follow various collaboration models and always **strive to adapt our offers to the needs of our clients as much as possible**. Our team will take your budget, timeline, and tech requirements into account and propose a matching service package. Here are our two standard collaboration models, which we can further adjust to the needs of your team and product:

Time and Material

- ✓ **Best for:** complex, long-term projects with irregular workload
- ✓ **Billed:** per completed work in the billing period
- ✓ Changeable workflow and predictable budgeting
- ✓ High flexibility and change control at low risk
- ✓ Available at any stage of the software development life cycle
- ✓ High control over requirements and scope
- ✓ Regular, transparent, and easy-to-read test documentation to track QA results

Dedicated Team

- ✓ **Best for:** continuous scope of tasks with a regular workload
- ✓ **Billed:** in defined monthly payments
- ✓ Predictable budgeting and easy costs tracking
- ✓ Full team commitment
- ✓ High level of control over the project
- ✓ Fast resource scaling and replacement
- ✓ Regular, transparent, and easy-to-read test documentation to track QA results

Models of Partnership: Creating Value Together

Our vision of business partnership constitutes the following models:

Referral Partnership with Bonus Savings

As our partner, you get
a **10% bonus for 3 months**.
The client you refer gets
a **10% discount** on our services
for 3 months

Exclusive Partner Advantage

Under this partnership
model, you receive
a **10% bonus for 6 months**

White Label Collaboration

Our QA engineers become
a part of your team

Roadmap of Collaboration under Partnership Models

When time is of the essence we can start testing your client's software as a part of your team in **1-3 days**

1

Intro call/chat

We discuss your QA requirements and the qualifications of QA engineers necessary for the project

2

Request analysis

- If required, our team prepares an estimation of QA resources for your client's software, provides you with the CVs of our candidates, and arranges an interview;
- We agree on the testing scope, timelines, budget, and team;
- We also discuss the types of deliverables and forms of reporting that will be comfortable for you and your client

3

Start of collaboration

After signing the necessary documents, we start testing the software.

How Is Our Team Different?

Our experts are **proactive** and **highly motivated**

A part of our team is made up of **the best students that completed courses in our Training Center**. Every month, around 1000 people graduate from our program, and 0,1% of these talented students become our employees

We are **passionate** and **enthusiastic** about QA. We dive deep into the processes and are 200% focused

Our team has versatile experience in numerous fields and with different industries, so we always select **QA engineers with relevant expertise for specific projects**

How Do We Stay In-tune with the Industry?

1

We constantly develop our team, build personal growth plans, and find opportunities for continuous improvement

3

We keep track of new trends and services in the industry to implement them in practice (use of AI/ML technology, Web 3.0, new solutions for test automation, etc.)

2

Our specialists regularly improve their expertise, participate in QA webinars and conferences and complete additional courses

Tasks of Any Complexity

What if there is an unpredictable or challenging situation on the project?

Our Tech Lead will join your team and help solve the issue in the most efficient way.

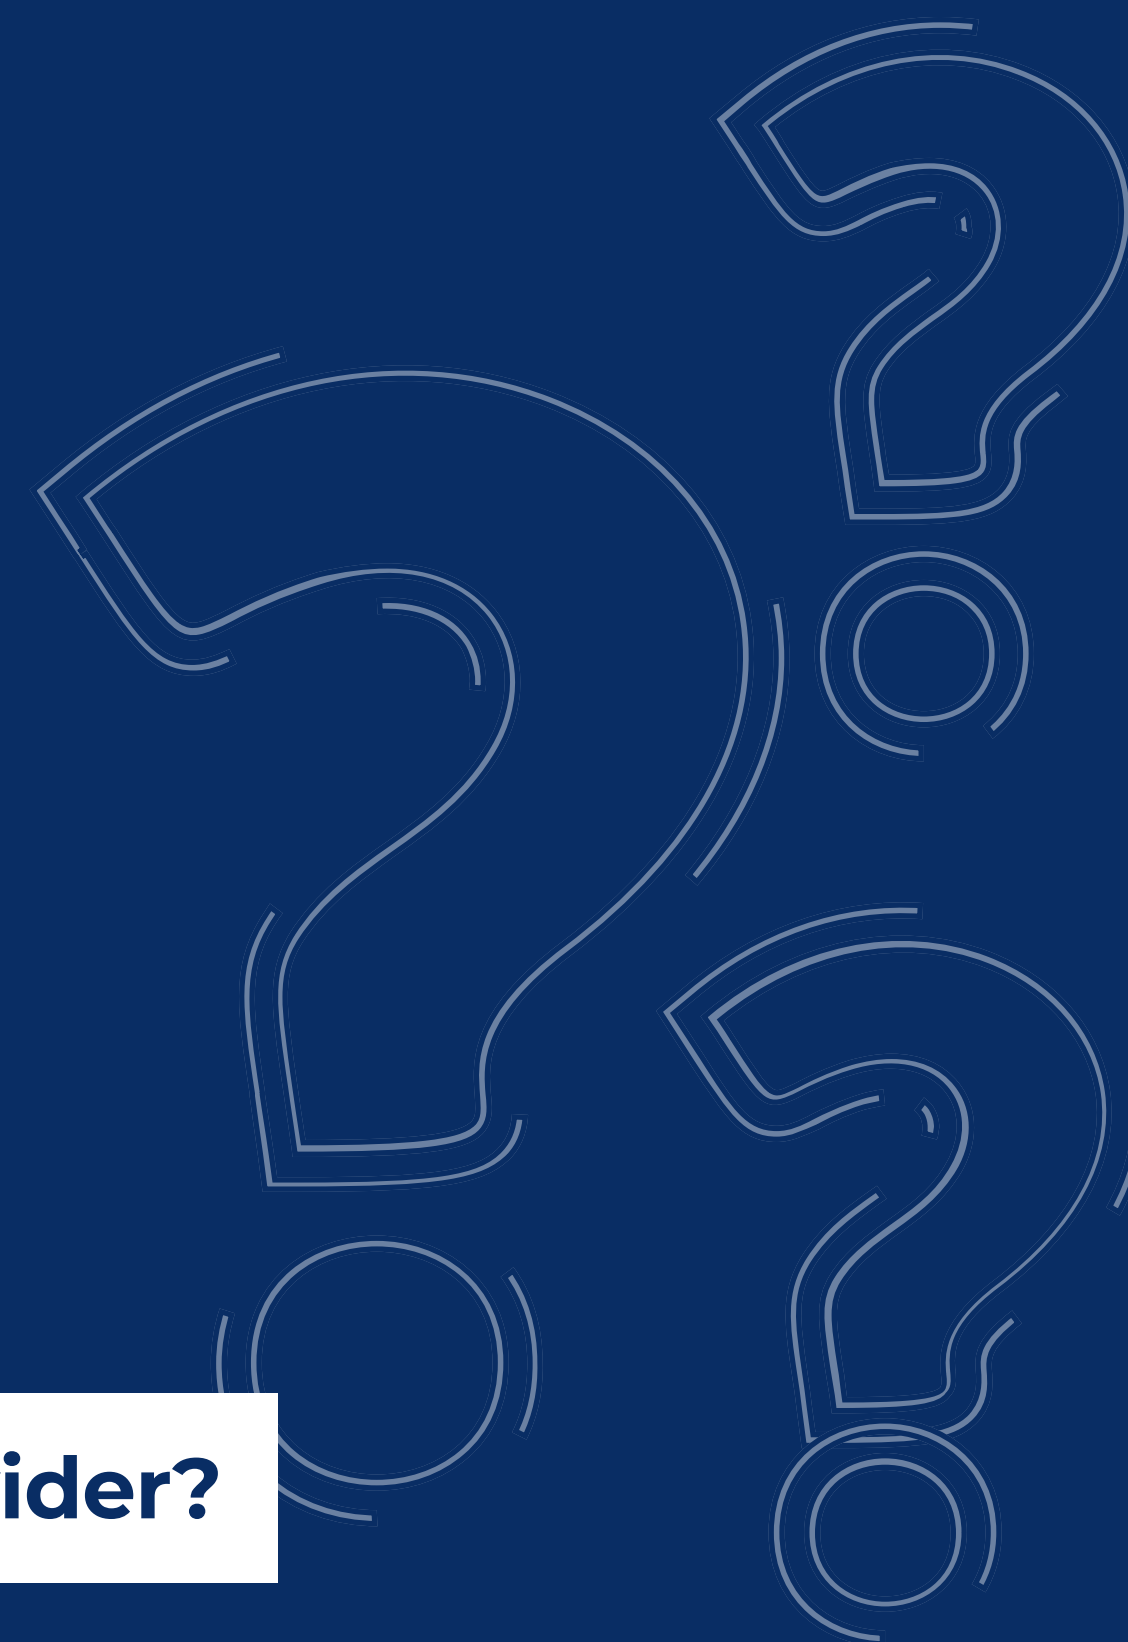

Don't know where to start testing or how to identify your QA priorities?

We will conduct a QA audit of your software to take those tasks off of your shoulders (including the analysis of your tech documentation, processes, raised tickets, etc.)

Worried about the quality of services when involving an independent provider?

Our specialists undergo technical certification regularly, improving and maintaining their qualifications.

Security

YOUR SECURITY MATTERS TO US

We guarantee your data security and confidentiality by signing NDA and following other security documents
